

1 kW photovoltaic panel price

Overview

A small residential solar panel system costs around \$14,210 before considering any financial incentives. On the bright side, that price effectively drops to \$9,937 after considering the full federal solar tax credit. Depending on your household energy needs, you might need a larger or smaller system. How much does a 1 KW solar panel cost?

The average price for a 1 kW solar panel array is between \$700 to \$1200 (just for the solar panels). Below, we've created a table that you can use to judge the different types of 1 kW solar setups and their pricing. We've expressed this in \$/W for better comparison.

What is a 1kW solar panel?

Instead, when you hear someone referring to a 1kw solar panel, they're actually referring to a 1 kW solar system made up of multiple solar panels equaling 1000 watts. For example, by connecting 10x 100-watt solar panels in series, you'd end up with a 1 kW solar array.

How many solar panels are in a 1kW solar kit?

Since the capacity is small, a 1 kw solar kit usually contains three solar panels. We offer monocrystalline modules from manufacturers from all over the world. Asian panels are the cheapest on the market. NA brands have higher prices but the quality is considered to be better.

How much electricity does a 1 KW solar panel produce?

For example, a 1 kW solar panel system will produce 1 kW of electricity for a few hours a day, but only when it's a clear sunny day. Below is a chart showcasing a 1 kW solar panel's electricity output over a summer's day.

How many kW solar panels do I Need?

If you plan to go completely off-grid, we recommend investing in a more extensive solar kit setup, such as a 3-5 kW solar panel kit. Below are the best

solar panels/brands to create your own 1 kW solar panel system. We provide you with single solar panels; you will need to multiply your order to build a 1 kW solar array.

How big is a 1 KW solar panel array?

The total size of this 1 kW solar panel array would be 5,3M². Remember that you'll need less space with more powerful solar panels to reach 1 kW of solar power. For example, you'll need 4.7sqm of space with 550-watt solar panels to get 1 kW, whereas, with 50-watt, you'll need 5.67sqm.
