

1850 watt solar panels

Overview

How much does a solar panel cost?

Today's premium monocrystalline solar panels typically cost between 30 and 50 cents per Watt, putting the price of a single 400-watt solar panel between \$120 to \$200, depending on how you buy it. Less efficient polycrystalline panels are typically cheaper at \$0.25 per Watt. The cost of a solar panel also depends on how you buy it.

Is one solar panel enough to power a house?

One solar panel is not enough to power a house. Home solar systems are designed to meet the unique needs of the homeowner, whether it's aiming for 100% offset, oversizing to account for a future EV purchase, or perhaps constrained to specific locations on the roof.

Where are solar panels made?

Designed in Switzerland, developed in Germany and manufactured sustainably. installed by experts. We have been sun worshippers from the very beginning – for over 40 years, we have been working to transform the clean and endless energy of the sun into sustainable electricity.
