

20 Photovoltaic Panel Solar Panel Price

Overview

On average, a 2 kW solar panel system costs \$6,360, according to real-world quotes on the EnergySage Marketplace from 2025 data. However, your price may differ—solar costs can vary significantly from state to state. How much does a 2 kW solar system cost?

As of January 2022, the average cost of solar in the U.S. is \$2.77 per watt (\$5,540 for a 2-kilowatt system). That means the total 2 kW solar system cost would be \$4,100 after the federal solar tax credit discount (not factoring in any additional state rebates and incentives).

Where can I buy solar panels?

We will customize the system for your property and calculate how much energy your solar panels will produce for you. Wire, conduit, fittings, breakers, AC/DC Disconnects (if required), junction boxes and a sub panel (if required) can be purchased at any electrical supply shop, Home Depot or Lowes.

What is included in a 2KW solar installation kit?

Complete 2kW DIY solar panel kit for home installation. Each DIY solar install kit includes solar panels, microinverters, and racking.

How much electricity does a 2 kW solar system use?

The cost of electricity where you live is the most significant determinant of your solar savings. The table below shows average estimated electricity production numbers for 2 kW solar energy systems in cities across the U.S. By comparison, the average household in the U.S. uses 893 kilowatt-hours (kWh) a month, which equals 10,715 kWh per year.

How much electricity do solar panels produce?

The amount of electricity your solar panels produce depends on many factors, including the direction and angle of your roof. The most important one is how sunny it is where you live – for example, a 2 kW system in Las Vegas makes

about 30 percent more electricity in a year than in Philadelphia.
