

20GWh large-scale industrial energy storage project

Overview

How many energy storage containers does Hithium block have?

The new facility officially went live in early June, with the delivery of Hithium's 16 energy storage containers, each with a capacity of 3.44MWh, to Solarpro. Solarpro, in turn, managed the entire project lifecycle – from design, to implementation, and integration of the SCADA management system. Hithium ∞ Block 3.44MWh container.

How will a pumped storage power plant contribute to the energy transition?

The company is making a significant contribution to the energy transition and is continuing its corporate transformation towards more renewable energy generation. By storing energy, the pumped storage power plant will contribute to greater security of supply in southern Germany.

How can energy storage technology improve resiliency?

This FOA supports large-scale demonstration and deployment of storage technologies that will provide resiliency to critical facilities and infrastructure. Projects will show the ability of energy storage technologies to provide dependable supply of energy as back up generation during a grid outage or other emergency event.

Why should we invest in a pumped storage power plant?

By storing energy, the pumped storage power plant will contribute to greater security of supply in southern Germany. This investment is part of our previously announced strategy to invest in growth and transformation towards a greener business.

What is the energy storage Grand Challenge summit?

Acceleration Vouchers for Innovators, Communities, and ESGC Summit
Participants Attendees at the Energy Storage Grand Challenge Summit will have an opportunity to learn about and apply for a voucher to access storage

modeling and analytical capabilities at DOE national labs.
