

5kW PV module price

Overview

On average, a 5 kW solar panel system costs \$13,550, according to real-world quotes on the EnergySage Marketplace from 2025 data. However, your price may differ—solar costs can vary significantly from state to state. How much does a 5kW Solar System cost?

The actual pricing varies by region due to various regional incentives, with the average price of a 5kW system ranging from \$8,880 to \$11,840. Moreover, the total amount for a 5kW solar system with battery price can also be influenced by choices in solar panels, charge controllers, and inverters.

What are the components of a 5kW Solar System?

The system includes the following components: 5kW solar panels: A total of ten 550W solar panels. 5kW solar system battery: A 48V Lithium version battery. 5kW solar system inverter: A 48V MPPT Solar Inverter. 5kW solar system installation kits: The installation kit includes a panel stand and DC wiring.

What is a 5kW Solar System?

A 5kW solar system is self-sustainable and can meet the power requirements of homes, small offices, and shops. It offers more output than a 4kW solar system and can charge most household and kitchen appliances, such as coffee makers, kettles, lights, TVs, heaters, ACs, and much more.

Where can I buy a 5 kW solar system?

Featuring daily updates with the lowest prices on solar panels, SunWatts has a big selection of affordable 5 kW PV systems for sale. These 5 kW size grid-connected solar kits include solar panels, DC-to-AC inverter, rack mounting system, hardware, cabling, permit plans and instructions.

How many solar panels does a 5kW Solar System need?

Let's explain the concept below: A 5kW solar system typically needs 15 - 20

solar panels, though the exact number will depend on their output and efficiency. For example, 13-14 solar panels with an output of 400W built with monocrystalline silicon solar cells are enough to build a 5kW solar system.

Can a 5kw Solar System be used with a battery?

If you pair your 5kW solar arrangement with a battery, you can store any excess power for later use. So, you will make significant savings if your energy consumption is moderate or less than average. However, a 5kW solar system might not be sufficient for a household with high energy consumption.
