

70 kilowatts of solar energy

Overview

If you want to build a powerful solar system for your business or residence, this is the place where you can one. A 70 kW solar system provides you with a steady.

Systems of a commercial and industrial scope are generally installed on the ground because there is just not enough space for putting all the modules on the roof.

Solar systems of commercial and industrial scope take a long time to build: from several months and up to year. The cost of a 70kw solar system will depend on.

A 70kW Solar Kit requires up to 2,200 square feet of space. 70kW or 70 kilowatts is 70,000 watts of DC direct current power. This could produce an estimated 8,500 kilowatt hours (kWh) of alternating current (AC) power per month, assuming at least 5 sun hours per day with the solar array facing South.
