

Albania s new energy storage prices

Overview

Why does Albania need to import energy?

Changing weather patterns over the years have forced the country to import energy to cover domestic needs, as a lack of storage capacity requires Albania to sell its generated power during peak months of production.

How much does gas cost in Albania?

Gasoline Prices in Albania averaged 1.61 USD/Liter from 1998 until 2025, reaching an all time high of 2.20 USD/Liter in June of 2022 and a record low of 0.57 USD/Liter in December of 2000. source: The Transparency Board
Gasoline Prices in Albania increased to 2.08 USD/Liter in June from 2.01 USD/Liter in May of 2025.

Is Albania a good place to invest in renewables?

Opportunities for renewables, and especially for solar and wind energy, are extensive in Albania. According to IRENA's Renewables Readiness Assessment report (2021), the solar radiation is very high throughout most of its territory, with the country enjoying some of Europe's highest number of sunshine hours per year.

Is Albania a net energy importer?

Today, Albania remains a net energy importer as domestic energy production is not able to meet demand. When it comes to renewable energy imports, Eurostat data shows that the country ranks 8 th in Europe.

Will Albania's energy crisis deteriorate further this winter?

Things might even deteriorate further this winter. The current energy crisis seems to be threatening an already precarious energy situation, with the Prime Minister cautioning that this winter could be the hardest Albania has ever encountered. Capitalising on Potential.

How can Albania solve the energy crisis?

In addition to eliminating the electricity deficit and taking electrification to new sectors, Albania can increase its potential to unlock new industries and investment using clean energy. The country can explore opportunities to produce green hydrogen through solar and wind power.
