

Argentina Energy Storage Smart Energy Project

Overview

The international tender, first announced in February, aimed to secure 500 MW of energy storage capacity for critical points in the Buenos Aires Metropolitan Area (AMBA) grid. In a strong show of interest, 15 companies submitted 27 different project proposals. Can battery energy storage modernize Argentina's grid?

Argentina's ambitious push toward grid modernization through battery energy storage has received an enthusiastic response, with CAMMESA (Compañía Administradora del Mercado Mayorista Eléctrico) confirming the submission of 27 project proposals from 15 companies under its AlmaGBA program.

Why is Argentina a good stance on energy storage?

In Argentina, the stance provides a good lesson to the European stakeholders, especially in the commercial and industrial segments of energy storage. Emerging markets can present both local and foreign players by developing tenders that are investment appropriate and clear technically and financially secured.

Will Argentina integrate new electricity storage infrastructure into urban distribution networks?

This national and international open call, part of Resolution SE 67/2025, marks Argentina's first large-scale effort to integrate new electricity storage infrastructure into urban distribution networks.

Can energy storage be a reliable source of energy?

As the opportunity to build energy storage as a reliable source in grids and to decarbonize becomes critical on a global stage, the oversubscribed tender launched by Argentina demonstrates the demand for scalable and bankable C&I energy storage systems projects, as well as the efficiency of collaborating with the government in their realization.

What is the Buenos Aires grid program?

Intended to strengthen the grid in the greater Buenos Aires region, the program has attracted a lot of attention; it has been subscribed to projects that are about twice the desired capacity.

What is Argentina's contingency plan?

This tender is part of a series of measures that the government of Argentina has been developing since October 2024 with the Contingency Plan, which includes short, medium and long-term actions to recover an electricity system that was in a critical state in December 2023.

Argentina Energy Storage Smart Energy Project

Autel Energy Completes First U.S. EV Charging + Battery Storage Project

2 days ago· Autel Energy, a global leader in electric vehicle (EV) charging and smart energy solutions, today announced the completion of its first integrated EV charging and battery ...

[Argentina's First Battery Energy Storage Systems Tender Draws ...](#)

In a global context where energy storage is becoming critical for grid reliability and decarbonization, Argentina's over-subscribed tender illustrates the appetite for scalable, ...

[Argentina's Largest Electricity Distributor Pursues Energy Storage](#)

Argentina's largest electricity distributor is pursuing energy storage opportunities. The focus is on integrating clean energy solutions while enhancing distribution efficiency. Key ...

Argentina Receives 1.3GW of BESS Proposals for First-Ever 500MW Energy

Argentina's ambitious push toward grid modernization through battery energy storage has received an enthusiastic response, with

CAMMESA (Compañía Administradora ...

[700 MW solar storage hybrid plant in Navoi , C&I Energy Storage ...](#)

Cracking the Code: Smart Profit Models in the Energy Storage Field a solar developer, a city planner, and an EV charging startup founder walk into a bar. Their common headache? How ...

[Argentina awards 667 MW in first battery storage tender](#)

1 day ago· Argentina has concluded its first battery energy storage (BESS) tender, awarding 667 MW of projects--well above the 500 MW target--after receiving bids totaling 1,347 MW from ...

[Argentina opens tender to contract 500 MW of BESS capacity ...](#)

The Ministry of Economy of Argentina has issued a national and international open call "GBA Storage -AlmaGBA", aimed at contracting 500 MW of electric energy storage plants ...

[Argentina's first energy storage tender receives 1,347 MW of bids](#)

In a strong show of interest, 15 companies submitted 27 different project proposals. These represent a combined investment commitment of over \$1 billion and a total of 1,347 MW ...
