

Austria medical supplies lithium battery pack

Overview

Are lithium-polymer batteries a good choice for medical devices?

Lithium-polymer batteries are a popular choice for use in medical devices due to their lightweight design and high-capacity. Our lithium-polymer backup batteries are often used in portable medical equipment, such as relaxing chairs and shower chairs, where a compact and lightweight power source is essential.

What is a battery pack in medical devices?

The Battery Pack is a replaceable primary power source for the Compression Module in medical devices. It is suitable for devices like the DRAEGER ETHYLOMETRE 7410+ and uSmart® 3200T NexGen.

Why are lithium-ion batteries used in medical devices?

Lithium-ion batteries are commonly used in a variety of medical devices because of their high energy density and durability. In addition our high quality lithium-ion batteries have a low self-discharge rate. Our lithium-ion backup battery will retain its charge for a longer period of time when not in use.

What is battery-powered hospital equipment?

Battery-powered hospital equipment encompasses a wide range of devices crucial for patient care and medical procedures. These devices rely on the reliability and safety of battery systems to ensure uninterrupted operation, especially in critical situations.

What types of backup batteries can be used in medical devices?

We have a big collection of different types of high quality backup batteries that can safely be used in medical devices. We have SLA/VRLA, NiMH, Lithium-Polymer and Lithium-Ion batteries. One of the key applications of SLA/VRLA batteries is in the medical industry.

Do you have medical batteries for your medical devices?

We have batteries for your medical devices such as patient hoists, shower chairs / trolleys, relaxing chairs and working chairs. Our medical batteries are perfect for your medical devices from Arjo, Invacare, Joerns, HandiCare and many more.
