

Base Station Communication Products Company

Overview

What does a base station do?

It serves as the central hub that connects multiple user devices (such as radios, mobile phones, or IoT devices) to a network, enabling long-range communication. Base stations are equipped with transmitters and receivers, which help to send and receive radio signals to and from mobile devices.

What brands of base stations does PSI offer?

PSI is proud to offer a variety of base stations from high quality, trusted brands like Motorola and Codan. If you need help choosing the right equipment for your needs or have any questions, please don't hesitate to get in touch today for assistance. Contact us today for a free consultation!.

Why should you choose a high-performance base station?

Modern base stations can support a large number of devices, making them ideal for dense urban areas or critical infrastructure environments. High-performance base stations deliver dependable connectivity even in challenging conditions, ensuring consistent communication.

Can a base station be installed remotely?

A Base Station can be remotely mounted or installed, and they can also be installed to operate from a desktop configuration, allowing you to design a system that truly suits your organization or application's unique needs. PSI is proud to offer a variety of base stations from high quality, trusted brands like Motorola and Codan.

What is a DMR wireless intercom/base station?

The RBS Series DMR Digital Wireless Intercom/Base Station is a cost-effective, AC or 12VDC powered 2-way radio wireless intercom. Solve tough communication problems with the RadioNexus transceiver. Connect them end-to-end or use with additional 3rd party hardware to achieve extended

coverage.
