

Base station DC distribution box

Overview

What is dcdu-12b?

DCDU-12B provides stable power distribution for the TDS-LTE Base Station System. It is the DC distribution unit or device. It serves for distributing the DC power needed for different power needed devices like RRU, EMUB, BBU, and many more.

What is a DST Telecom rackmount DC distribution panel?

The DST is a high density Telecom Rackmount DC Distribution Panel designed to accommodate virtually any 48V, 24V or 12V DC power distribution requirement. Its flexibility makes it ideal for all telecom site DC power requirements, large and small.

Which distribution supply is used for a hydroelectric generating station?

For a small hydroelectric generating station, AC and DC distribution supply is used. However, the transfer switch arrangements shown between the chargers and the two batteries in this example, which allow either charger to charge either battery, are less common.

How many ports does a dcdu-12b have?

It consists of two input terminal blocks and 10 different ports for output. Each port or certain port is assigned for its maximum output fuse current. DCDU-12B provides stable power distribution for the TDS-LTE Base Station System.
