

# **Battery cabinet telecommunications**

## Overview

---

What is a battery cabinet?

Battery cabinets are a convenient storage solution that encourages staff to maintain the correct handling and storage procedures. By charging and storing batteries in the one location, you are reducing the likelihood of batteries being lost, stolen, damaged or left in unsafe conditions (such as outdoors).

What are the different types of battery backup cabinets?

Battery strings can be disconnected and moved with minimal to no network disruption. 12V Battery Backup (BBU) cabinets ideal when a large battery backup is required. Composite Pads (CPAD) have replaced poured-in-place or pre-cast concrete pads because they enable more rapid network deployment.

What is a CIBR battery rack?

Charles Indoor Battery Racks (CIBR) are modular, seismic Zone 4 rated (GR-487 certified) battery rack systems designed to fit the footprint of VRLA batteries from a variety of battery manufacturers or Saft Tel.X Ni-Cd batteries. In addition to several standard configurations, there are also single tray options that can be built on site.

What is a 2V battery enclosure?

Amphenol 2V Battery Enclosures allow operators to recover valuable, conditioned space within existing buildings by enabling the movement of large 2V strings outside. Battery strings can be disconnected and moved with minimal to no network disruption. 12V Battery Backup (BBU) cabinets ideal when a large battery backup is required.
