

Belarus Energy Southern Power Grid

Overview

Most energy in Belarus is cheap fossil gas from Russia, and Belarus is a net energy importer. According to IEA, the energy import vastly exceeded the energy production in 2015, describing Belarus as one of the world's least energy sufficient countries in the world. Belarus imports oil from Russia, and sends back.

The country is one of the world's largest importers of natural gas with estimates for 2018 being about 17 Mtoe (20 billion cubic metres [bcm]) of natural gas, making it the leading importer among the so-called EU4Energy countries: .

Because non-nuclear thermal power plants are ramped up and down depending on heat requirements, and nuclear is not very flexible, increased battery storage has.

Belarus is a large oil refiner, listed 36th in the world, at 19 Mt of oil products in 2018 by the IEA. It has two refineries and oil pipelines built during.
