Overview

Is your combustible storage explosion proof?

In high level fire-rated regulation, all structures for flammable storage must be explosion proof. US Hazmat Storage can provide expert combustible storage advice, with over 30 years of experience.

What makes a container explosion-proof?

Containers for explosion-proof zones feature specially designed internal and external components that are blast-resistant, which promotes greater safety during shipping. The focus is on ensuring that parts that come in direct contact with the cargo are built to resist explosions, which significantly reduces the risk.

How do I choose a container for explosion-safe storage?

The containers offer ease of placement and relocation, allowing flexibility for your storage site. To find out how these units can be customized and receive a pricing estimate, simply request a quote. In Summary: Choose from 10 ft or 20 ft containers for explosion-safe storage suitable for offshore.

Why should you choose anti-explosive containers for explosion-proof zones?

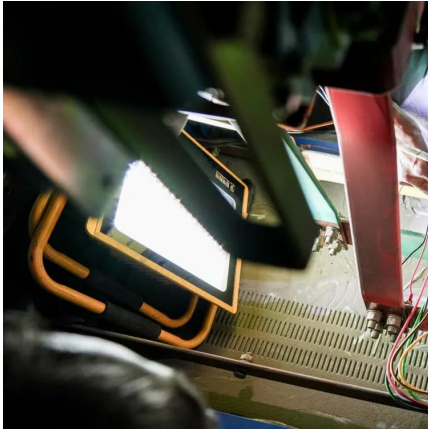

When shipping dangerous cargo in explosion-proof zones, it is imperative to choose anti-explosive containers that are built to meet these challenges. Containers for explosion-proof zones feature specially designed internal and external components that are blast-resistant, which promotes greater safety during shipping.

Are explosion-proof reefer units a good investment?

Explosion-proof reefer units can also provide substantial cost savings for your company. A blast could ruin an entire shipment, which means you will have to bear the expense of replacing it (although insurance could offset some of the cost in some cases).
