

Bosnia and Herzegovina wind and solar hybrid power system

Overview

Active wind power projects in various stages of development in Bosnia and Herzegovina may add up to 2.2 GW to the country's electricity production capacity, on top of the two existing facilities with an overall 86.6 MW and the two wind farms under construction with a combined 114 MW.

Suzlon Wind Energy BiH has signed an amended concession agreement for its Ivan Sedlo wind power plant of 25 MW in Hadžići in the Sarajevo Canton. The subsidiary of Danish-based Suzlon Energy said it expects construction to start in August and to begin.

Investors in BiH advanced or just announced the development of 2.2 GW in wind farms in the past few years, excluding the.

There are only two wind farms online in BiH. EPBiH completed the 50.6 MW Mesihovina system in 2018, while the Jelovača facility, with the capacity of 36 MW, was connected one year later. The Independent System Operator in Bosnia and Herzegovina.
