

# **British container power generation manufacturers**

## Overview

---

What is a containerised generator?

Our Containerised Generators deliver robust, high-capacity power from 300–3,000 kVA in secure, weather-resistant enclosures. Designed for challenging environments and critical applications, they offer noise reduction, easy transport, and bespoke configuration to meet your site's exact needs.

What can containerising generators do for You?

These bespoke solutions include noise reduction systems for traditional generators, accommodating twin sets within a single container, and rental-ready designs. Containerising generators allows us to deliver a broader range of innovative and flexible power solutions. Enhanced Durability: Optional C4 paint finish for tough environments.

Who is Interpower Generators Ltd?

Email us @ : [sales@interpower-generators.com](mailto:sales@interpower-generators.com) Interpower Generators Ltd is dedicated in delivering high quality, efficient and effective products, built upon ethical standards. To make Interpower Generators Ltd the company of choice. The values stand on a foundation of Integrity, Professionalism, Performance and Value in Customers.

What BS 7671 standards does a container house generator have?

All wiring is designed to meet BS 7671 standards, ensuring compliance and reliability. These containers house generators ranging from 800kVA to 3000kVA, available in 20ft, 40ft, and 45ft sizes, tailored to fit your specific needs. Contact us today to discuss your requirements.

What are endcape canopy & container generators?

Endcape canopy & container generators have been designed to offer the lowest noise levels, in the smallest footprint, while remaining competitively priced. Every canopy is manufactured from the highest quality materials, and

powder coated prior to having it's acoustic lining fitted, ensuring longevity once it is in service.

What are the benefits of a containerised power supply system?

This containerised approach offers benefits such as mobility, easy deployment, and scalability. It can be used in various applications such as remote locations, disaster recovery, events, back-up power and construction sites where there is a need for reliable power supply.
