

Brunei s largest energy storage project

Overview

The 30-megawatt project, to be constructed on a 33.29-hectare remediated landfill in Kampong Belimbing, marks a critical step in the Sultanate's ambition to shift towards a 30 per cent renewable energy mix and cut greenhouse gas emissions by 20 per cent by 2030. What is Brunei's largest national solar project?

KUALA LUMPUR: Solarvest Holdings Bhd's subsidiary Atlantic Blue Sdn Bhd has secured Brunei's largest national solar project, with a generation capacity of 30 megawatts (MW). The project will be developed through a joint venture company, Seri Suria Power (B) Sdn Bhd, in partnership with Serikandi Oilfield Services Sdn Bhd and Khazanah Satu Sdn Bhd.

How many kWh will solarvest generate in Brunei?

It is expected to generate 64,473,000 kWh once it starts commercial operations, which will be supplied under a 25-year power purchase agreement (PPA) with the Government of Brunei, represented by the Department of Electrical Services. Solarvest says the project will be built for an estimated BND 34 million (\$26.46 million).

Why is Brunei launching a solarvest project?

Solarvest executive director and group chief strategy officer Leon Liew Chee Ing said the project reflects Brunei's strong commitment to a cleaner, more sustainable energy future, given the nation's abundance of fossil fuels.

Will Brunei become the largest plant in the world?

Upon completion by the end of 2026, it is set to become the largest plant in Brunei, with an annual output of more than 64.47 million kilowatt-hours (kWh), with a potential to offset about 645,000 one million British thermal units (MMBtu) of natural gas and 92 million tonnes of carbon dioxide.
