

Build the largest factory for energy storage power stations

Overview

Tesla has signed its first deal to build a grid-scale battery power plant in China. The U.S. company posted on the Chinese social media service Weibo that the project would be the largest of its kind in China when completed. Will Tesla build a grid-scale battery energy storage station in China?

Tesla has officially signed a ¥4 billion (C\$764/US\$557 million) deal to build its first grid-scale battery energy storage station in China, leveraging its Megapack technology.

Will Tesla build a battery storage facility in China?

File Photo by John Angelillo/UPI | License Photo June 20 (UPI) -- Tesla Friday signed a \$556.8 million agreement to build a grid-scale battery storage station in China. The deal is with China Kangfu International Leasing Co., as well as the Shanghai local government. It's the first Tesla large-scale battery storage facility in China.

Why is Tesla building a large-scale energy storage facility in China?

Their growing use helps stabilize power grids, prevent outages, and reduce reliance on fossil fuels. This project is Tesla's first large-scale energy storage installation in China, complementing its existing automotive manufacturing presence in the city through Giga Shanghai.

Will China build a battery storage station in 2025?

China plans to add nearly 5 gigawatts of electricity supply powered by batteries by the end of 2025, which would bring the total capacity to 40 gigawatts. Tesla Friday signed a \$556.8 million agreement to build a grid-scale battery storage station in China.

Will a battery energy storage system be the largest in China?

The U.S. company posted on the Chinese social media service Weibo that the project would be the largest of its kind in China when completed. Utility-scale

battery energy storage systems help electricity grids keep supply and demand in balance.

Should Musk build a battery power plant in China?

And in China, where grid modernization is both a national priority and a policy-supported opportunity, it gives Musk's company a powerful foothold. The Shanghai battery power plant would "effectively solve the pressure of urban power supply and ensure the safe, stable, and efficient electricity demand of the city," the company said.
