

Building a solar home system

Overview

A DIY solar system guide that teaches you everything from basic electrical rules to sizing your solar panels.

By now you're probably aware of the fact that solar equipment doesn't come cheap. It would be irresponsible for you to make such a large investment.

Electricity is used in almost every household throughout the world. If you're wanting to build a DIY solar system it is critical that you understand the basic.

Today, technological advancement has led to multiple types of PV systems being created. Each one suits a certain situation better than the other. It is important that you understand which PV system will best suit your DIY build. The 4 types of solar systems are: 1. Grid-tied system 2. Hybrid system 3. All-in-One system 4. Off-grid system .

Knowing how to size your solar system is one of the most important aspects of your DIY build. Thankfully, it is not the most complicated process. Below we will outline how to size a grid-tied, hybrid, and off-grid solar system. All you need to do is follow along with the steps we outline. In our opinion, this is one of the most enjoyable parts of t.
