As long as the generator is designed for that voltage, then yes. Obviously any such generator (solar or wind) needs to be as efficient as possible, so all parts have to be designed ...

[DIY battery pack, can the inverter and charger be used simultaneously](#)

For an off grid application with a generator and no solar - I am putting together a 24V battery, being charged by a Honda EU2000i generator into AIMS 24V/37A charger, and ...

[Converting a 24V alternator with an inverter in a 230V generator ...](#)

The engine of my truck exists with 24V 35/55/80A alternators, so I assume that on the 80A model I could use about 50A (so roughly

1000W) without impacting the core of the truck.
