

Canadian energy storage tank sales price

Overview

Who is energy storage Canada?

Energy Storage Canada is the only national voice for energy storage in Canada today. We focus exclusively on energy storage and speak for the entire industry because we represent the full value chain range of energy storage opportunities in our own markets and internationally.

How much does a storage tank cost?

Storage tank costs are tabulated in this data-file, averaging \$100-300/m³ for storage systems of 10-10,000 m³ capacity. Costs are 2-10x higher for corrosive chemicals, cryogenic storage, or very large/small storage facilities. Some rules of thumb are outlined below with underlying data available in the Excel.

Why are LNG storage tanks so expensive?

LNG storage tanks thus come in as some of the most expensive storage facilities in the data-file, because they are very large and cryogenic. Higher capex may be worthwhile to install higher grade tanks that minimize boil-off and improve energy efficiency.

How much money does Canada give to Investissement Québec?

The Government of Canada is providing a conditional contribution of \$322 million through the Strategic Innovation Fund, and the Government of Québec is providing a partially forgivable loan of \$322 million through Investissement Québec.
