

Chad Portable Power Supply Customization

Overview

What sets our custom power supplies apart?

What truly sets our custom power supplies apart is our unwavering dedication to meeting the unique needs of each client. Our facility boasts state-of-the-art design capabilities, enabling us to craft bespoke solutions that perfectly align with specific application requirements.

How do you ensure the reliability of custom power supplies?

To ensure the reliability of custom power supplies, we focus on designing for durability, selecting high-quality components, rigorously testing prototypes, maintaining strict control over the manufacturing process, and conducting burn-in testing to identify potential failures. What types of custom power supply technologies do you offer?

.

How do I request a custom power supply?

You'll have access to free consultation for potential projects, ensuring peace of mind. We prioritize quick turnaround times to keep your operation powered. To start, simply fill out our custom power supply request form with a brief description of your project, the type of power supply you need, and your contact information.

How do I consent to receive news from custompowersupply?

By submitting your email address, you consent to receive news from CustomPowerSupply.net. ©2024 CustomPowerSupply.net | All Rights Reserved. Our custom power supply solutions stand out for their precision and flexibility, specializing in the design of sub-1000W power supplies.

How to set current limit on PD power supply?

Here are the steps to set the current limit on the PD power supply Short the

output positive and negative terminal. Now, the power supply should automatically switch into CC mode. Release the shorted terminal, now the power supply should automatically switch back to CV mode. Increase the voltage until the target voltage output is reached.

Can I DIY a PD power supply from scratch?

If you are planning to DIY one from scratch (only the PCB is printed, all other parts are manually soldered), consider using reversion 5 by HCCLAB which has been optimized for manual soldering. The firmware used by this PD power supply requires Arduino IDE with CH55xduino installed. There are no external dependencies except the above board library.
