

China Southern Power Grid Energy Storage Company Project

Overview

What is China Southern power grid energy storage?

China Southern Power Grid Energy Storage, the energy storage division of China Southern Power Grid, has commissioned a 10 MWh sodium-ion battery storage station in Nanning, southwestern China. The company said the facility is the first large-scale project of its kind in China, and the first phase of a 100 MWh global project.

Where is China Southern power grid deploying a 10 MWh sodium-ion battery?

China Southern Power Grid has deployed a 10 MWh sodium-ion battery in China's Guangxi Zhuang region. It is the first phase of a 100 MWh project. China Southern Power Grid Energy Storage, the energy storage division of China Southern Power Grid, has commissioned a 10 MWh sodium-ion battery storage station in Nanning, southwestern China.

What is China Southern power grid's Guangxi Power Station?

Constructed by China Southern Power Grid's Guangxi branch, this station is only the first phase of a larger 100-MWh project. When fully operational, this initiative is expected to annually supply 73 million kWh of clean power, adequate to meet the needs of 35,000 households, while simultaneously reducing carbon emissions by 50,000 tons.
