

Colombia develops photovoltaic module project

Overview

What is the largest PV project in Colombia?

Once fully operational, it will be the largest PV project in Colombia. Enel Colombia has installed the last solar panels for the 486.7 MW “Guayepo I & II” solar park.

What is the largest solar project in Colombia?

Once operational, the 486.7 MW solar park in Colombia will be the largest PV project in the country. The project is already delivering energy to the National Interconnected System as part of a testing phase.

Why are photovoltaic systems important in Colombia?

The implementation of photovoltaic systems in Colombia has enabled 2% of the population in areas that do not have access to electric energy to meet their lighting, refrigeration and leisure needs, allowing them to expand their capacities and improve their quality of life. The systems that have been installed are mainly focused on the rural sector.

Is photovoltaic technology a viable option for ZNI zones?

Current electricity demand is approximately 61.684 GW h/year. Recognizing that photovoltaic technology is the most viable for ZNI zones because of the average radiation in Colombia, it is recognized that there is a deficit at the National level, inasmuch as less than 3% of the population is supplied with this type of energy.
