

Communication 5G base station range

Overview

For providing a wide range of services, 5G networks can operate in three frequency bands—low, medium or high. 5G can be implemented in low-band, mid-band or high-band millimeter-wave. Summary In , 5G is the "fifth generation" of technology, as the successor to the (4G), and has been deployed by worldwide since 2019. Compared.

5G networks are , in which the service area is divided into small geographical areas called cells. All 5G wireless devices in a cell communicate by radio waves with a via fixed.
