

Congo Kinshasa pack lithium battery

Overview

Can the Democratic Republic of the Congo produce lithium-ion battery cathode precursor materials?

London and Kinshasa, November 24, 2021 – The Democratic Republic of the Congo (DRC) can leverage its abundant cobalt resources and hydroelectric power to become a low-cost and low-emissions producer of lithium-ion battery cathode precursor materials.

What does Congo & kobold metals have in common?

Congo and Kobold Metals agree on exploration tie-up to boost critical-minerals output. The newly awarded permits are located in southeastern Congo near the Manono lithium project, which KoBold has ambitions to develop into a major mine. The rights allow the company to prospect for lithium, manganese, tin, and tantalum in the region.

Is Africa a good place to buy a battery?

Africa has a wealth of critical battery raw materials and is in a position to use these to attract more value-add in downstream processing and manufacturing.”.

Why did a US company get a mining licence in Congo?

The licences were granted just weeks after the Berkeley, California-based company signed an exploration pact with the Congolese government, part of a broader push to attract American investment into the country’s mining sector.
