

Construction of 5G base stations in various cities in Ireland

Overview

Where is 5G available in Ireland?

Since 2019, several mobile operators have started rolling out 5G networks throughout Ireland. As of October 2020, there are 5G networks available in the major Irish cities and towns (Dublin, Cork, Galway, Wexford, Waterford).

Will Ireland achieve 5G coverage by the end of 2025?

Looking ahead, Ireland aims to achieve virtually nationwide 5G coverage by the end of 2025. Innovations such as 5G Standalone networks are being introduced, offering dedicated 5G core networks that enhance speed, reduce latency, and support advanced features like network slicing.

How will 5G impact Ireland?

The deployment of 5G is set to revolutionize various aspects of daily life and industry in Ireland: Smart Cities: 5G will enable the development of smart city technologies, such as intelligent traffic management and energy-efficient systems.

Why does Ireland need 5G broadband?

“Since 5G launched, it has opened up opportunities to Ireland as we strive to compete in a global environment where connectivity is crucial.” 5G broadband offers a viable alternative to both older, slower, networks and slow-to-expand fibre networks, he points out.

How is 5G transforming Ireland?

Numerous industries in Ireland are undergoing transformation thanks to 5G. From healthcare to manufacturing, transportation to agriculture, 5G's capabilities are creating a ripple effect of innovation. Real-time data exchange, remote operations, and enhanced connectivity are driving efficiency and opening doors to new possibilities.

Which 5G network is the fastest in Ireland?

As of 2025, Three Ireland boasts over 92% 5G coverage, making it the fastest and most consistent 5G network in the nation. Eir and Vodafone are also making significant strides, with Eir offering 5G services to over 74% of the population and Vodafone providing coverage in selected areas across all 26 counties.
