

Cost of 1 MW of solar energy

Overview

As of recent data, the range for the average cost falls between \$1 million to \$3 million, depending primarily on regional variables and the design of the solar power system. Costs can also incorporate the price of land, if applicable, labor, permitting fees, and additional logistics. How much does a 1 MW solar power plant cost?

For a 1 MW solar power plant, land requirements typically range from 4 to 5 acres, depending on the region and panel configuration. The land cost varies significantly based on location, with rural areas offering more affordable options ranging from \$3,000 to \$10,000 per acre.
