

Cuban solar panel photovoltaic sun room

Overview

What is a solar park plan in Cuba?

The objective of the solar park plan in Cuba is the construction of a total of 92 photovoltaic installations which, according to the official schedule, should be completed before 2028. Each of these parks would have a capacity of 21,87 MW, which would allow for an estimated total generation of around 3.400 gigawatts/hour per year.

How many photovoltaic solar parks are there in Cuba?

Cuba began the construction of 59 photovoltaic solar parks with the idea of reducing dependence on fossil fuels and creating other wastelands in which clean energy is the main resource for electricity consumption. Of these 59 solar parks, it is expected that: 33 are completed within the current year, synchronizing with the national energy system.

How many solar panels are there in Cuba?

This greatly underdeveloped energy source is slowly making its way across the island: there are currently more than 6,000 photovoltaic panels and 1,500 solar heaters in use. The installed solar energy generating capacity in Cuba is around 3 megawatts, or 0.07 % of the total installed capacity.

Where can solar power be harnessed in Cuba?

Also included in the project works is the construction of two solar photovoltaic power plants in Las Tunas Province in Cuba's eastern region, where flat, unshaded terrain affords an optimal environment for harnessing solar energy.

Are solar panels a win-win situation in Cuba?

The solar panels are suitable for both for domestic and com systems and for distribution throughout the country. It's a win-win situation." The output will increase coverage to some 130,000 people. In order to encourage the transition to solar energy, the Cuban government is heavily subsidizing the

cost of the PV panels and solar heaters.

Why should Cuba invest in solar energy?

Cuba intends to be a active participant in global objectives on reducing greenhouse gas emissions. In this sense, solar energy is one of the most promising renewable sources in Cuba and a fundamental pillar in its strategy of transition to clean energy.
