

Cyprus home energy storage power supplier

Overview

How many energy storage applications have been approved in Cyprus?

The Cyprus Energy Regulatory Authority (CERA) representatives reported establishing a regulatory framework for energy storage in 2019, followed by market rules approval in 2021. The Cyprus Transmission System Operator has received 13 storage applications totaling 224 megawatts capacity, with eight applications processed and five under review.

How does electricity production work in Cyprus?

As of 2017, electricity production has been liberated in Cyprus. The TSO and DSO transmit to the end customer via the grid, the energy that various producers inject at different locations nationwide. The billing company essentially plays the role of an energy broker, trying to keep the balance between the customer and the producer. 3095.

Why does Cyprus waste so much energy?

AKEL MP Costas Costa characterised Cyprus as “the only country in the world where thousands of megawatt-hours go unused due to lack of centralised green energy storage systems,” adding: “During the day we waste megawatt-hours because we lack storage, and at night we are one step away from blackouts.”
