

Czech energy storage power supply price

Overview

Where does the Czech Republic buy oil & gas?

The country is integrated into regional transmission systems and can purchase oil and gas from different countries based on market prices in Rotterdam or elsewhere. Most oil and gas are imported via Germany. The Czech Republic has two nuclear power plants at Dukovany and Temelin, which delivered over 31 TWh of electricity in 2022.

Will a battery storage system help Czech companies achieve net zero?

The high penetration of renewable generation projects in the region could deliver a large amount of clean energy and really accelerate the journey to net zero, but at the moment Czech companies are not in a position to reap the full benefits of solar and other renewable energy sources. To do so, battery storage will be essential.

Why are Czech businesses investing in renewable projects without subsidies?

The subsidy increases to cover up to 75% of costs for community projects. But what we noticed at Wattstor is that Czech businesses are investing in renewable projects even in the absence of subsidies, because they have realised the strong business case for generating clean energy on site.
