

Desert photovoltaic panel finished product manufacturer

Overview

What is a desert solar panel?

Solar Panel for Hot Areas We Are the Inventor of the Original DESERT Technology The J.v.G. Thoma DESERT solar panel is a world-class solar panel backed by extensive expertise and experience (over 10 years of research and development, plus more than 5 years in mass production).

Who is desert technologies?

Energizing Tomorrow, Powered by Nature. Desert Technologies is a leader in renewable energy, providing cutting-edge solar PV and smart infrastructure solutions that drive global sustainability.

Who is DT solar?

With an established track record as a PV developer, investor, EPC, and O&M contractor, as well as a PV solar panel manufacturer and energy storage systems integrator, DT demonstrates expertise across the entire smart infrastructure ecosystem. Advanced solar module manufacturing with precision, efficiency, and sustainability.

How many GW of solar panels will Modon produce a year?

The facility will produce solar panels and cells with an annual production capacity of up to five gigawatts (GW) at a total investment of SAR 750 million. It will span an area of 170,000 square meters on a land provided by Modon. The complex includes advanced production lines with a capacity of two GW for solar panels and three GW for solar cells.
