

Do you need to use Beiya photovoltaic panels

Overview

Should you buy a solar PV system for your home?

Well-chosen solar panels can provide a reliable source of renewable electricity for decades, helping to slash your electricity bills and cut your carbon footprint. But buying an inappropriate solar PV system for your home could leave you out of pocket.

Can a solar panel be installed on a bifacial roof?

Solar panels are typically fitted on top of your existing roof, but you can also choose solar tiles and slates, which blend in better. However, these are pricey and may only be practical if you're replacing your roof at the same time. Bifacial solar panels also exist, which can generate electricity from both sides of the panel.

What are photovoltaic (PV) solar panels used for?

First, this guide is intended for photovoltaic (PV) solar panel installations, a technology separate from thermal solar collectors, which are commonly used for home water heating. Within the realm of electricity-generating photovoltaics (PV), there are several types of solar panels that can be used for various purposes.

Do you need a solar battery?

Solar batteries can be added to your solar system to store solar energy for later or if you want to use it overnight. Storage batteries also allow a PV system to operate when the electric grid is not available. If you want your solar panels to operate during a power outage, you need to pair them with a solar battery.

What type of solar panels do you need?

Silicon is the most common. Before you invite any solar panel firms to give you a quote, consider what type of solar PV you want. The most popular, most

efficient and most expensive option. Very space efficient, so they need the smallest amount of roof space. Made from a very pure form of silicon.

What if my roof is not suitable for solar?

If a solar professional determines that your roof is not suitable for solar, or you don't own your home, you can still benefit from solar energy. Community solar allows multiple people to benefit from a single, shared solar array that can be installed on- or off-site.
