

Dominica s first photovoltaic module project

Overview

Why did the Dominican Republic build a photovoltaic plant?

The energy deficit and dependence on fossil fuels drove the Dominican Republic to step up its commitment to clean energy. DOMINION took on the task of building the photovoltaic plant in this Caribbean country, with an offer that included everything from the design and construction of the plant to its operation and subsequent maintenance.

Why did the Dominican Republic start a solar park in 2022?

On 2022, DOMINION completed the commissioning of El Soco photovoltaic solar park in the municipality of Consuelo, Dominican Republic. The energy deficit and dependence on fossil fuels drove the Dominican Republic to step up its commitment to clean energy.

What is the future of photovoltaic energy in the Dominican Republic?

Finally, the future perspectives of photovoltaic energy in the country are presented, based on current studies of projects that could be installed in the near future. It is estimated that the Dominican Republic could exceed 1.5 GW installed by 2030.
