

Dominican Republic Industrial Energy Storage Quality Merchant

Overview

How does energy storage work in the Dominican Republic?

By adding energy storage instead of utilizing existing thermal power plants to maintain frequency, the Dominican grid operator can enable the power plants on the island to run at their most efficient generating level while the battery systems absorb and discharge energy on the grid as needed.

What is AES Dominicana – battery energy storage system?

The electro-chemical battery energy storage project uses lithium-ion as its storage technology. The project was commissioned in 2017. The AES Dominicana Andres – Battery Energy Storage System was developed by Fundacion AES Dominicana. The project is owned by The AES (100%).

What is AES Dominicana doing with a DPP Advancion energy storage array?

AES Dominicana is using its Andres and Los Mina DPP Advancion energy storage arrays to provide fast, accurate frequency control to the Dominican grid, balancing second-to-second variations between electricity consumed and produced.
