

East Africa 5G base station distribution points

Overview

How many 5G networks are there in the Middle East?

This includes eight in the Middle East and 10 in Africa. The first full commercial 5G mobile service in the MEA region was introduced by Etisalat in the United Arab Emirates (UAE) in May 2019, followed closely by its domestic rival Du the following month.

Is Africa ready for 5G?

The opportunities are tremendous, but so are the challenges. Although Africa as a whole is embarking on its 5G journey at a slower pace than more advanced markets, the region is well placed to benefit from an increasingly mature global 5G ecosystem, evidenced by increasing competition in the equipment supply and applications markets.

How many 5G networks are there in Africa?

There are now commercial 5G networks in more than 10 countries in the region, with stakeholders in many more countries expecting commercial 5G to be available in their markets by 2025. By the end of this decade, there will be more than 340 million 5G connections in Africa, equivalent to a fifth of total mobile connections.

What drives 5G growth in the region?

Driving forces behind 5G growth in the region include a positive economic outlook and forward-thinking regulatory measures for building out network coverage, meaning the stage is set for the telecom market to thrive in the region. Some key markets in the region have already launched 5G Fixed Wireless Access (FWA) services.

Is 5G a problem in Africa?

5G has been the subject of misconceptions in many countries, including some in Africa. This has resulted in potential customers expressing concerns about

the technology and hesitation to adopt 5G services when it becomes available in their markets.

Will 5G increase the number of cell sites in Africa?

Decreasing channel size from 100 MHz to 60 MHz in the 3.5 GHz range will require increasing the number of cell sites by 64%. 5G has been the subject of misconceptions in many countries, including some in Africa.
