

Energy Storage Project Cooperation Development Plan

Overview

How can we sustainably scale up energy storage in developing countries?

To sustainably scale up the deployment of energy storage in developing countries, technologies will need to be able to operate in harsh climatic conditions, supply electricity over long duration periods, and sustainably manage issues such as the reuse and recycling of batteries.

What is the energy storage strategy & roadmap (SRM)?

WASHINGTON, D.C. – The U.S. Department of Energy (DOE) today released its draft Energy Storage Strategy and Roadmap (SRM), a plan that provides strategic direction and identifies key opportunities to optimize DOE's investment in future planning of energy storage research, development, demonstration, and deployment projects.

How can energy storage help developing countries?

By connecting stakeholders and sharing experiences in deploying energy storage, the ESP will help bring new technological and regulatory solutions to developing countries, as well as help develop new business models that leverage the full range of services that storage can provide.

How will the ESP impact the energy storage industry?

By developing and adapting new storage solutions to the needs of developing countries, the ESP will help expand the global market for energy storage, leading to technology improvements and accelerating cost reductions over time.

Does the energy storage strategic plan address new policy actions?

This SRM does not address new policy actions, nor does it specify budgets and resources for future activities. This Energy Storage SRM responds to the Energy Storage Strategic Plan periodic update requirement of the Better Energy Storage Technology (BEST) section of the Energy Policy Act of 2020

(42 U.S.C. § 17232 (b) (5)).

How will a pumped storage power plant contribute to the energy transition?

The company is making a significant contribution to the energy transition and is continuing its corporate transformation towards more renewable energy generation. By storing energy, the pumped storage power plant will contribute to greater security of supply in southern Germany.
