

Energy storage inverter OEM

Overview

What services does an OEM solar inverter offer?

OEM Services If the customer already has their product design, we can provide manufacturing and testing services and then deliver the product. As the OEM solar inverter is custom designed, the product will be manufactured exclusively for the customer. **ODM Service.**

What is the difference between OEM and ODM solar inverter?

As the OEM solar inverter is custom designed, the product will be manufactured exclusively for the customer. **ODM Service** When our inverters do not meet your specific requirements and your company does not have an off-the-shelf product, our team of engineers can work with you to customise the inverter to meet your requirements.

What is the power range of a DC inverter?

It supports DC-coupled DC strings and is ideal for applications where high power capacity and efficiency are critical. With a power range of 125kW to 1.725MW, this inverter provides a scalable, modular solution for commercial, industrial, and grid-support applications.

How much does it cost to customize an inverter?

Customize inverter appearance (logo/color/packing/documents.) only, no cost charged if meets MOQ of material vendors. Deeper level customization like hardware changing, its costs happen accordingly. (2) Certificate costs.

*Customers should learn clearly what certifications are required from local government and Electricity Company.

What is a sine wave inverter?

With its high-quality pure sine wave output, this inverter ensures compatibility with sensitive electronics and high-power devices, making it ideal for both residential and industrial applications. Its robust low-frequency design

guarantees durability, high surge capacity, and reliable performance in demanding environments.
