Overview

Why do Estonians have electricity plans?

Most Estonians have electricity plans linked to the current spot price, enabling them to respond to hourly price fluctuations and manage their consumption more efficiently. Estonia is an active participant in the European Union's electricity market. This integration is pivotal for the country's energy policy and market dynamics.

Is the electricity market open in Estonia?

The electricity market in Estonia has been fully open to all market participants since the beginning of 2013, and consumers can choose a suitable seller and price package for themselves.

What is Estonia's energy landscape?

Estonia's energy landscape is distinct, with a significant portion of its electricity generated from oil shale. This abundant natural resource has historically been the backbone of the country's energy production. While oil shale remains a major energy source, Estonia is gradually diversifying its energy mix.

What is Estonia's energy policy?

The development of wind is the main priority, with a lot of offshore projects. After failing to reach an agreement with Finland, Estonia is developing several LNG terminal projects. The Department of Energy of the Ministry of Economic Affairs and Communications is responsible for the energy policy.

How does the Estonian electricity grid work?

The Estonian electricity grid is interconnected with several neighboring countries. These connections facilitate the exchange of electricity and enhance the overall reliability and efficiency of the energy supply.

Who regulates the energy sector in Estonia?

The Estonian Competition Authority regulates the energy sector and reports to the Ministry of Economic Affairs and Communications. Four main operators are involved in the supply, trading, and logistics of oil: Alexela, Vopak EOS, Scantrans (Ireland) and Eurodek (Denmark).
