

Estonian energy storage tank wholesale prices

Overview

What is Estonia's energy plan?

Estonia aims to limit the share of oil shale in its energy mix and targets a share of at least 65% of renewables in total final consumption in 2030. Eesti Energia dominates the power sector with 85% of generation, over 95% of distribution, and around 50% of total sales.

Who regulates the energy sector in Estonia?

The Estonian Competition Authority regulates the energy sector and reports to the Ministry of Economic Affairs and Communications. Four main operators are involved in the supply, trading, and logistics of oil: Alexela, Vopak EOS, Scantrans (Ireland) and Eurodek (Denmark).

What is Estonia doing in 2023?

Oil shale dominates the energy mix (57% in 2023), with 2/3 used in power generation and 1/3 used to produce fuel. The development of wind is the main priority, with a lot of offshore projects. After failing to reach an agreement with Finland, Estonia is developing several LNG terminal projects.

How much Russian gas does EE import?

cluding intra-EU trade. For the EU27 average, the total imports are based on extra-EU27 imports. While Eurostat 2020 data report a 46% import gas dependency on Russia for EE, accounting for the secondary dependence on Russian gas through intra-EU imports would lead to the estimation that EE has a 98% Russian i.

What is Eesti Energia doing in 2021?

Eesti Energia dominates the power sector with 85% of generation, over 95% of distribution, and around 50% of total sales. The share of oil shale in the power mix was reduced from 88% in 2010 to 46% in 2023. Gas prices more than doubled in 2021 and 2022 and have decreased significantly since then.
