

Finnish cabinet-type energy storage system manufacturer

Overview

With the exception of the batteries, the entire solution from controllers to inverters is manufactured in our own premises in Finland using innovative and high.

Creating a successful business case in the energy storage market is a collaborative process that hinges on understanding the customer's specific needs and.

The electricity market is in transition, and it is essential to keep up with the times. We are constantly looking for ways together with our customers to find new.

That's why we created Enico | Jupiter – a unique, next-generation energy storage system that scales with your needs and drives your business towards smarter energy management. Our solutions support the integration of renewable energy and help you optimize your energy usage. What is an energy storage system?

An energy storage system enables property-specific optimization of electricity consumption and energy costs. It can also be used to participate in grid frequency reserve markets. Enico | Jupiter scales to large-scale renewable energy applications and hybrid power plants.

Is energy storage a future-proof solution?

Energy storage is no longer an option but a necessity for sustainable growth and competitiveness. Enico Oy launches a next-generation energy storage solution: Enico | Jupiter. This fully modular product family, based on European technologies, brings cost-efficiency to energy storage projects – and delivers future-proof solutions today.

Why should your business use an energy storage system?

With an energy storage system, your business is protected from power outages and market volatility. Depending on your needs and applications, energy storage can serve a variety of purposes. The modular Enico | Jupiter system is your gateway to a smarter, more sustainable energy future.

Modular. Intelligent. Scalable.
