

Gambia three-phase low voltage inverter

Overview

What is a lvsmt series 3 phase inverter?

12-35kW | Three Phase Up to 6 MPPTs
GoodWe's LVSMT Series three-phase inverter is designed with low voltage power input, and is an ideal choice for commercial installations. Developed as an efficient response to South American market needs for low-voltage inverters above 10kW, this series is applicable to special gr.

What is a goodwe lvsmt series inverter?

Low voltage ranges within the region. With the GoodWe LVSMT Series inverter, the system configuration can be simplified by avoiding the installation of an expensive transformer, greatly reducing the initial Power Generation for High turnsMax. Efficiency up to 98%

Why is the lvsmt series a good solar inverter?

The fuse-free design without consumable parts significantly reduces the operating time and costs. With max. 15A DC input current per string, the LVSMT Series is compatible with different types of high-power modules, which ensures more solar power absorption, making it one of the most productive inverters on the market.
