

Georgia sun room photovoltaic panel price

Overview

As of September 2025, the average solar panel system costs \$2.46/W including installation in Georgia. For a 5 kW installation, this comes out to about \$12,293 before incentives, though prices range from \$10,449 to \$14,137. How much do solar panels cost in Georgia?

As of October 2024, the average solar panel system costs \$2.63/W including installation in Georgia. For a 5 kW installation, this comes out to about \$13,173 before incentives, though prices range from \$11,197 to \$15,149. After the federal tax credit, the average price drops by 30%. You'll probably pay even less than what we show here.

Do solar panels increase home value in Georgia?

Yes, solar panels increase home value in Georgia. Typically, you can expect to boost your home's value by around 4.1%. Based on the average Georgia house price, that's an increase of \$12,204, a significant increase.

Can solar panels withstand hail in Georgia?

Solar panels are made from tempered glass, and many manufacturers test the panels to withstand hail that falls at 50 miles per hour. Areas in Georgia that are prone to hailstorms may consider a solar panel cover to offer extra protection. HomeAdvisor's Guide to the Cost of Solar Panels in Georgia explores solar panel cost by type and location.

How long do solar panels last in Georgia?

The payback time for solar panels in Georgia is around 12 years, after which you'll be making significant energy savings. And thanks to net metering, if you have a system that generates more energy than you need, you can sell it back to the energy grid and reach full payback a year or two faster.

What is a typical solar system size in Georgia?

The typical system size for solar systems in Georgia is 11 kilowatts (kW). To

determine what system size you need, find the amount of electricity you used in the last year in kilowatt-hours (kWh) by going to your old bills or your local utility's online dashboard. Then, divide your annual number of kWh by 1,200.

How much does a power system cost in Georgia?

For Georgia, you can use \$3.52 per watt to determine the price of a larger system (system size x price per watt x 0.7 to account for tax incentives). High Power Bills?

Cost: About \$12,635 for a 5 kW system to \$22,743 for a 9 kW system after tax credit. Savings: 7 year payback; about \$24,566 saved over 20 years.
