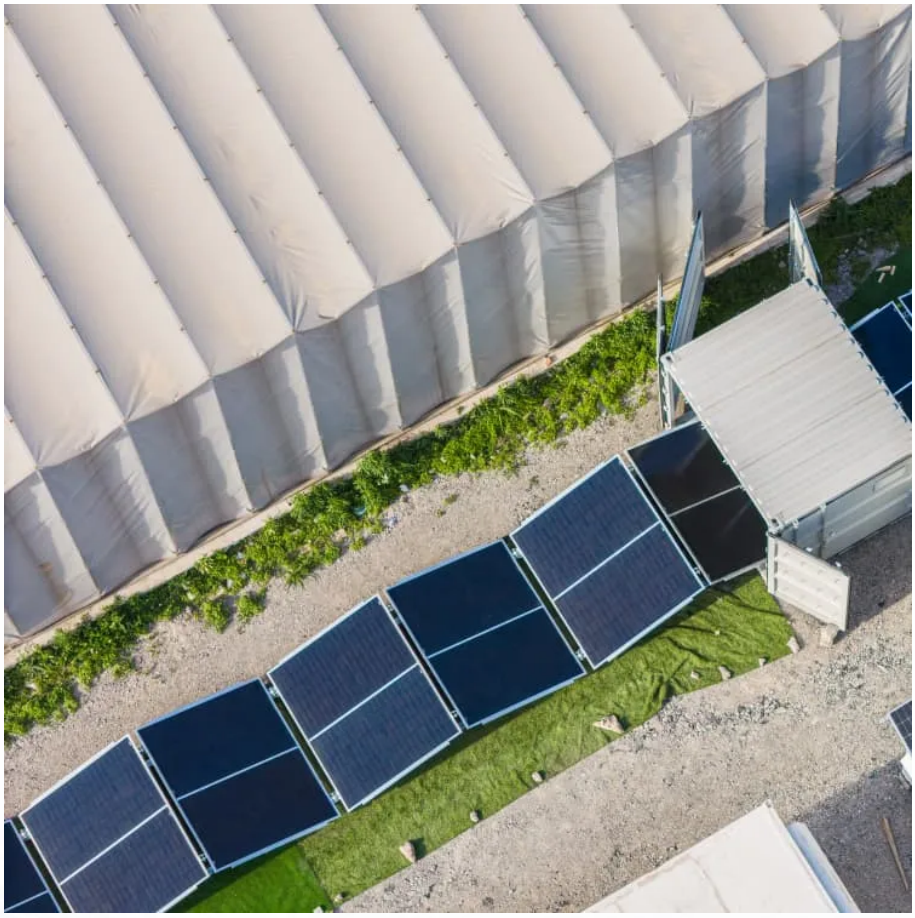
German Industrial Energy Storage Cabinet Quote



Overview

Will a 250 MW battery energy storage project be completed in Germany?

In October 2022, Fluence Energy and TransnetBW announced plans to develop a 250 MW battery energy storage (BES) as a transmission project in Germany. The Netzbooster project is expected to be completed in 2025. Such developments and government initiatives are likely to boost the demand for energy storage in the country during the forecast period.

Will Germany install 30 GW offshore wind energy turbines by 2035?

However, Germany is planning to install 30 GW offshore wind energy turbines by 2030, 40 GW by 2035, and 70 GW by 2045, which may require large-scale energy storage systems, thus creating a vast opportunity for companies in the coming years.

How will Germany's energy transition change?

The boom in batteries and other storage technologies is expected to impact Germany's energy transition significantly. Installed wind energy capacity in Germany has also witnessed significant growth in recent years, growing from 26.9 GW in 2010 to 63.7 GW in 2021.
