

Guatemala Solar Panel Project

Overview

Guatemala is poised to significantly increase its solar energy capacity by 30% in 2025 with the addition of two substantial solar parks. The first, the 20 MWp San Francisco Solar Park in Escuintla, developed by Spanish company Solarpack, is anticipated to be operational by the end of 2024 (source).

Guatemala Solar Panel Project

Guatemala approves grid connection for 75 MW Tierra del Sol Solar Project

The project includes over 168,000 solar panels and 240 inverters, and will connect to the national grid via the Jaguar Energy Substation. Approved through public tender in ...
