

Home enlarged inverter

Overview

Which solar inverter is best?

CNET experts have compared the most popular solar inverters' specs, warranties, prices and more. The SolarEdge Home Wave Inverter is our top pick in 2025. It was the most efficient inverter we looked at, letting you use a larger percentage of the energy your solar panels generate. This translates to less and more power to use around the house.

How much does a solar inverter cost?

Your solar adventure starts here—let's light it up! The Enphase IQ8 is a top pick for its reliability, panel-level optimization, and 25-year warranty—especially great for shaded or complex roofs. Solar inverters cost between \$1,500 and \$5,000, depending on the type (string, micro, or hybrid) and your home's energy needs.

What is a solar inverter?

The solar inverter. It's the behind-the-scenes wizard that turns your panels' raw sunlight juice (DC power) into something your home can actually use (AC power). Pick a dud, and your solar dreams fizzle. Pick a champ, and you're golden.

Why is a solar inverter so dangerous?

Why?

Because the inverter is the brain of your solar system, and it's also, historically, the device that has the highest probability of failure, which can leave you in the dark (literally and figuratively). A solar inverter's main function is to switch DC power created by solar panels into AC power that's usable for your home appliances.

Why do you need an inverter for a large home?

Inverters for large homes are essential for ensuring uninterrupted power during outages, especially in areas with frequent load shedding. These inverters are designed to support multiple appliances such as lights, fans, televisions, and even refrigerators, keeping the household running smoothly.

How does a solar inverter work?

A solar inverter's job is simple: It converts the direct current -- the electricity generated by your solar panels -- into alternating current electricity that your appliances run on. Selecting the right solar inverter for your home is tricky, but most solar installers usually handle the task, meaning you likely won't have much choice.
