

How many times can the outdoor power supply be charged and discharged

Overview

How long does a portable power station last?

A portable power station's lifespan is largely determined by its battery cycle life. This means the amount of times it can be charged and recharged before capacity drops.

How long does a battery last in a power station?

This means the amount of times it can be charged and recharged before capacity drops. Most modern power stations, including Pisen's models, use lithium batteries, which typically last hold 500 to 1,000 charge cycles (battery cycle life) before their capacity drops to around 80%.

How many times can a Pisen power station charge a phone?

Put it this way: the highly popular Pisen Portable Super Fast Charging Outdoor Power Station 1000W can charge your smartphone around 100 times in one go - which means, theoretically, the power station can charge your phone up to 100,000 times before it even starts to drop capacity.

How many Watts Does a portable power station use?

Every portable power station comes with a rated capacity, typically measured in watt-hours (Wh). This figure represents the total amount of energy stored in the battery. For example, an OUPES portable power station with a 1,000Wh capacity theoretically supplies 1,000 watts for one hour or 100 watts for ten hours.

How much power does an oupes portable power station use?

For example, an OUPES portable power station with a 1,000Wh capacity theoretically supplies 1,000 watts for one hour or 100 watts for ten hours. However, this is only the theoretical limit—real-world usage often differs. To estimate runtime, you must first determine the power draw of your devices.

How does charging a power station affect battery life?

The second is Intensity of Usage: Depending on the type of appliances you're charging with your power station, you can extend or shorten the battery's lifespan. (For example, a low-wattage appliance like a smartphone won't degrade the battery anywhere near as much as a high-wattage appliance like a blender).
