

How much is the subsidy for solar photovoltaic panels in Burundi

Overview

Are solar panels tax deductible?

The federal solar investment tax credit currently lets you claim 30% of your total solar system costs as a credit when you file taxes. Some places also offer tax credits that can reduce what you owe on state taxes. Property tax exemptions: Many states exclude the added home value from solar panel installations when calculating your property taxes.

How much does a solar panel installation cost?

Solar panel installation costs vary significantly, but a typical residential system is between \$10,000 to \$30,000. On the high end, some solar company reviewers tell us they paid up to \$100,000 for a complete system. If you buy a solar panel system, you may be eligible for tax credits or other financial incentives that offset the initial cost.

How much does a solar system cost?

There's no way around it — going solar is expensive. A typical residential system costs \$10,191 to \$28,714, depending on what incentives you're eligible for, the size of your system and other factors. It's definitely in your best interest to take advantage of all the solar incentives available to you.

Is the solar tax credit still available in 2025?

Update May 2, 2025: The 30% federal solar tax credit is still available, although its future is uncertain under the Trump Administration. To claim this credit on your 2025 tax return, your system must be installed and inspected by December 31, 2025.

How much does a SREC-II Solar System cost?

In the SuSI program, solar owners can earn and sell SREC-IIs worth \$85 for each MW of electricity their system produces for 15 years. With an average system producing ~8 MW per year, that adds up to \$680 per year and

\$10,200 over 15 years. Learn more about the SuSI program [here](#).

How much does a 7 kilowatt solar system cost?

A typical 7-kilowatt residential solar panel system is \$20,197. On the bright side, that cost drops to \$14,138 after using the full ITC. One of the biggest benefits is that the tax credits can accelerate your break-even point.
