

How to start the site energy battery cabinet

Overview

Where can a battery cabinet be installed?

Ranging in 300 to 400mm deep they are suitable for installation in walkways, sides of buildings, alongside industrial equipment and areas with limited space. The cabinets come pre-wired with all interconnecting battery cables and a DC busbar for easy indoor or outdoor installation of our batteries.

How do you put batteries in a cabinet?

Using a 2 person lift, insert batteries into cabinet standing them up vertically with battery terminals facing upwards. Securely fasten batteries in places using provided clamp bar and nuts. Connect corresponding Amphenol cables to batteries.

How many P series batteries can be installed in a cabinet?

DC isolator, main DC busbar and all interconnecting battery cables are provided and should be installed to suit your layout inside the cabinet. Up to 6 P Series batteries can be installed on the lower shelf, and an additional 6 P series batteries on the upper shelf.

How do I connect a battery to a PCE?

Connect corresponding Amphenol cables to batteries. PCE main cables or System main DC isolator can be connected to the main 250Amp (adjustable) integrated cabinet isolator. Note: Batteries should be loaded from the rear of the cabinet working your way to the front.

How do I install a battery in a PEW enclosure?

Ensure all filings from forming holes are removed from cabinet. Connect main DC cable from main System (PCE) DC isolator to the PEW enclosure DC busbar with M8 nut, washer and locking washer and tighten. Using a 2 person lift, insert batteries into cabinet standing them up vertically with battery terminals facing upwards.

How do you put batteries in a busbar?

Batteries can be slid into place on their side with their battery terminals face outwards. Using appropriate equipment or at least 2 people, lift and slide the batteries into the cabinet starting from the bottom shelf. Secure the busbar assembly back into place. Connect corresponding Amphenol cables to batteries.
