

# Huawei inverter default voltage adjustment

## Overview

---

Why is my Huawei solar inverter NOT working?

Turn off the AC output switch and then the DC input switch. Turn them on after 5 minutes and wait for the solar inverter to connect to the power grid. If the fault persists, contact your dealer or Huawei technical support. Cause ID = 1 The fuse is not in position or is blown. Cause ID = 2 The two relays on the breaking board are open-circuited.

How does a Huawei inverter work?

Issue 03 (2021-09-30) Copyright © Huawei Technologies Co., Ltd. The inverter is integrated with a comprehensive residual current detection unit to distinguish fault current from residual current. Upon detecting that the residual current exceeds the threshold, the inverter immediately disconnects from the power grid.

What if my Huawei solar inverter alarm persists?

If the alarm persists, contact Huawei technical support. Cause ID = 1-20 This alarm is generated when the PV string status is abnormal due to the following conditions: a single PV string is lost; both 2-in-1 PV strings are lost; one of the 2-in-1 PV strings is lost. Check whether the solar inverter terminals are properly connected.

How to install Huawei inverter outdoors?

You are advised to install the inverter in a sheltered place or install an awning over it. The inverter will be corroded in salt areas. Before installing the inverter outdoors in salt areas, consult Huawei. A salt area refers to the region within 500 meters from the coast or prone to sea breeze.

Can a sun2000 inverter connect to a neutral wire?

Network Application The inverter applies to grid-tied PV systems for commercial rooftop PV plants and large PV plants. The SUN2000 can also

apply to the AC power system with the neutral point grounding of the step-up transformer. The SUN2000 itself does not connect to any neutral wire.

Can a Huawei inverter be installed outside in Salt areas?

Before installing the inverter outdoors in salt areas, consult Huawei. A salt area refers to the region within 500 meters from the coast or prone to sea breeze. The regions prone to sea breeze vary with weather conditions (such as typhoons and monsoons) or terrains (such as dams and hills).
